

AERO PRODUCTS to acquires 4 Aircraft to kickstart the leasing business and fuel its inventory base.

Aero products India is in process to acquire 4 Aircrafts including 2 A319s and 2 A340s. These Aircrafts were last operated by a well-known and Government backed Airline. The Aircrafts are in storage since the services halted due to pandemic.

All the 4 Aircrafts are in excellent condition with good life on engines and APUs. The Airframes will be parted out to support the inventory base while the Engines will be kept for Lease or Sale.

In Addition to this Aero Products is in Advanced stage to close the negotiation and acquire several other Aircrafts with multiple airlines operating around the Globe. These Aircrafts include B737NG, A320 and couple of wide body Aircrafts as well.

"These Acquisitions will be marked as major milestones in the decade long journey of Aero Products India. The decision to expand and acquire was a hard decision to make as the aviation industry moves through the tough times with business shrinking. We understand that such acquisition will reap profits slowly and steadily. While the situation seems grim and tasteless, these times has also provided young companies like Aero Products to re-group , strategies and prepare for the future opportunities." Said Mr. Somesh Dubey CEO & Founder of Aero Products India
